SUMMARY OF QUALIFICATIONS

- Solid foundation in software engineering principles, full-stack development, and data structures through coursework, professional projects, and internship experience
- Experienced with C#, C++, C, JavaScript, .NET, Blazor, Razor, SQL, HTML, CSS, and Firebase
- Skilled in CRUD operations, database optimization, real-time application development, and cloud integrations
- Collaborative team player with experience in Azure DevOps, Agile/Scrum, and version control workflows

EDUCATION

Bachelor of Science in Computer Science; GPA 3.43
Washington State University (WSU), Pullman, WA

Expected December, 2026

RELEVANT COURSEWORK

Object Oriented Software Principles, Design and Analysis Algorithms, Program Design and Development C/C++, Advanced Data Structures C/C++, Software Engineering I, Programming Language Design

SKILLS

- Programming Languages: C#, C++, C, JavaScript, TypeScript, HTML, CSS
- Frameworks and Technologies: .NET, ASP.NET, Blazor, Razor Pages, React, Docker, Swagger
- Databases and Cloud: Firebase (Firestore, Authentication, Hosting), SQL Server Management Studio
- Tools and Practices: Azure DevOps, Git/GitHub, Visual Studio, Agile/Scrum, REST APIs

EXPERIENCES

Software Development Intern, Washington State University, Pullman, WA

July, 2025 – Present

- Contributing to new and ongoing projects by extending and maintaining the existing C# codebase using Blazor and Razor
- Developing and integrating features across the frontend, backend, and database layers, ensuring smooth end-to-end functionality
- Designing and implementing CRUD operations to support dynamic database interactions, enhancing database efficiency and performance
- Utilizing Azure DevOps for version control, CI/CD pipelines, and project management
- Collaborating with the development team to troubleshoot, optimize, and deliver high-quality code

PROJECTS

Network Connection Recommender Project, Client Project

January, 2026 – Present

- Architecting and developing a full-stack web application for professional network recommendation
- Designing frontend using TypeScript and implementing backend infrastructure with Firebase and Firestore
- Integrated secure authentication using Firebase Authentication (Email/Password + Google OAuth)
- Deploying and maintaining production builds using Firebase Hosting

Campus Incident Tracker, Group Project

March, 2025

- Designed the program to track and inform reported incidents happening across WSU's campus to enhance campus safety awareness and communication
- Developed application in JavaScript, HTML, and CSS to ensure cross-browser compatibility
- Integrated Firebase Authentication, Firestore, and Firebase Hosting for backend infrastructure, secure user authentication, application hosting, and scalability

AWARDS

AWS GameDay 3rd Place – Competed in team based cloud computing competition

2025

Northwest Chapter of the Year, ΣAB – Awarded for academic excellence and community service

2024

FIRST Inspires Team Spirit Award – Recognized for exceptional teamwork and collaboration

2023
